- 1-2 day increase shelf life of greens compared to hand cut
- Adjustable to rafts 18-24" wide
- Automated cutting blade height adjustment
- Variable speed controls for cutting blades, conveyors, blower systems
- Large Tote stand with room for weigh scale
- Ergonomic Design
- Optional Touch Screen Automation
- Easy to clean
- No assembly required

The Aqua Adjustable Harvester is made specifically for Aquaponic and Hydroponic growing conditions.

Its open design is made specifically to accommodate roots from the growing medium. The infeed belt is fully adjustable between 18 and 24 inches for a range of tray sizes to be loaded for harvesting. With a fast, consistent and clean cut, it means no bruising or tearing; allowing your harvested greens to stay fresh longer. The machine can harvest all types of baby leaf greens while comfortably fitting into your processing facility. It is ergonomically designed for use. Available customizations and add-ons including PLC's and HMI's for preprogrammed settings, Product Takeaway Conveyor and Root Trimming System.

We recommend this size harvester for growers who are harvesting 500+ trays a day.

Model	Raft Size	Farming Type	Dimensions	Footprint
24-18 AHS	18-24" wide	Hydroponics Aquaponics	Length: 144" Width: 58" Height: 75.5"	58 sq. ft
