

# Tote Stand & Take Away Conveyor

## The Gentle Produce Movement Solution

The Tote Stand & Take Away Conveyor is a great add-on to your existing Hamill Harvester. With its gentle conveying action, it protects micro / baby greens and grasses to reduce the amount of handling post harvest. By changing the direct of the greens they are able to be directed to the packaging area, while the empty trays are unloaded inline. The Tote Stand & Take Away Conveyor is perfect for growers that use a rolling bins system, larger bins, and industrial weigh scales. With its ergonomic design your bins are positions for ease of lifting by the harvesting team. It is easy to install, it simply bolts on to your Hamill Harvester and is controlled at the Harvester's control panel giving you increased automation.

### FEATURES
